```
Div {  
    Border-width: 10px 3px 5px 9px;  
}
```

What is the width of the right border? 3px

Border-width: top right bottom left;

3. The margin is the space between elements.
4. Padding is the space between an element and its border
5. The padding and margin do not take a color.
6. How much horizontal space ("width") will this div use?

```
Div {  
    Width: 50px;  
    Padding: 10px;  
    Margin: 1px;  
    Border: 2px;  
}
```

84

7. How much vertical space ("height") will this div use?

```
Div {  
    Height: 50px;  
    Padding: 5px 10px;  
    Margin: 5px;  
    Border: 2px;  
}
```

74

8. The text-decoration property is used to style the links with an underline. What text-declaration value will remove this underline from a link? None
9. The list-style-type property applies to both ordered and unordered lists.
10. Child selectors are more specific than descendant selectors.
11. The id selectors are part of the DOM.
12. The class selectors are part of the DOM, the class information is stored in the tree.
13. What is true about this code?
 <p class = "fancy box"> ... </p>
 From this code, we cannot know which styling will take precedence.
14. The period in front of the word body means the browser will look for a class called body, not the element.
